Work History

2023-04 -

Current

Senior Software Engineer

Angkas, Manilla

- Managed Android technological issues for assigned projects, increasing customer satisfaction ratings.
- Collaborated with the team to maintain and enhance product quality by actively participating in bug fixing activities, conducting thorough code reviews, and ensuring adherence to coding standards and best practices.
- Demonstrated keen attention to security by proactively identifying a vulnerability that was causing financial loss to the company.
- Patched the vulnerability swiftly and mitigate potential risks.

2022-09 -

2023-04

Senior Software Engineer

Kadel Labs Pvt. Ltd, Bangalore

Project: Novopay SLI (<https://trustt.com>)

- Successfully shipped multiple large-scale features rapidly while working under tremendous pressure, utilizing strong time-management and prioritization skills to meet tight deadlines.
- Implemented modern Android development practices into legacy code base, resulting in significant improvements to the overall app's efficiency and performance.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for

Technical Profile

- Android
- Kotlin
- Jetpack Compose
- Jetpack Libraries
- Model-View-ViewModel (MVVM) and MVP architecture
- Coroutines and Flow
- Kotlin Multiplatform for mobile
- Ktor
- Git

- Python
- Figma
- Docker
- Linux
- Postman
- Firebase, GCP, AWS
- JIRA

Software Development

Build releases

2021-12 -
2022-08

Android Developer

Zestmoney | Zerozilla, Bangalore

- Utilized Jetpack Compose to convert dozens of Figma prototypes to pixel-perfect code, ensuring seamless integration with existing XML UIs and delivering high-quality solutions that met or exceeded client expectations
- Consistently delivered high-quality, bug-free products that significantly improved user retention rates, utilizing thorough testing and debugging techniques throughout the development process
- Worked with teams from other projects and departments to create apps driven by customer input.

2020-11 -
2021-12

Mobile App Engineer

Paqman, Stockholm

- Took charge of the project as a full-stack engineer, effectively maintaining its development while creating both the app and KTOR micro-service-based APIs
- Utilized a range of technical skills to ensure seamless integration
- Single-handedly developed and brought a product idea to life, ensuring its successful delivery by maintaining a sharp and dedicated approach to the development process
- Conducted market research to gain insight into user needs and preferences, informing product development and ensuring that solutions met market demands.

Education

2015-08 -
2019-05

Bachelor of Engineering: Information Technology

Lakshmi Narain College of Technology - Bhopal, India

functionality, scalability, and performance.
